

# Project Engineer

- Your task** Project planning in the Automation Solutions team for production plants in the process industry.  
Commissioning of such plants around the world and thereby responsibility for customer satisfaction.  
Later, leadership of project teams at one of our international entities.
- Your profile** Ideally, a degree in electronic engineering, automation technology, process technology or similar. Experience in project planning / programming of conventional control systems. Ideally, very good programming knowledge of SIMATIC S5/S7 PLCs, MS Visual Basic/.NET and MS-SQL.  
Dedication, ability to work under pressure and eagerness to be involved in, develop through and to prove yourself in new challenges.  
You want to take on leadership responsibility in one of our global entities. Written and spoken English skills are a must, good knowledge of another language desirable, ideally also as a native language.
- Opportunities** Excellent development prospects in an interesting, dynamic environment: first to be promoted to Project Manager and later to management in one of our international entities.
- Locations** Germany, Austria, Netherlands, Spain, Russia, Brazil, Guatemala, Mexico, South Africa and China. Further locations are also planned.
