ProLeiT AG
Growth generates jobs:
ProLeiT expands its headquarters
and welcomes 500th employee

www.proleit.com

The solution provider for industrial automation, process control technology and Manufacturing Execution Systems (MES) recently welcomed its 500th employee to the firm's headquarters in Herzogenaurach, Germany. The computer scientist Tobias Schmidt now supports ProLeiT at its Pharmaceutical, Food & Chemical Centre of Excellence.

The global company recently celebrated the official opening of its

new building in Herzogenaurach. On 21 September 2018, the firm's third wing was officially opened, nearly two years after the laying of the foundation stone in November 2016. ProLeiT's founders

first considered this expansion 20 years ago and have now been able to implement it thanks to the continued success of the business. The positive order situation and an array of new customer projects ensure strong long-term growth for the software firm. Featuring roughly 4,500 square metres of ultra-modern office space, ProLeiT has taken this development into account and at the same time created the ideal foundations for new innovative ideas and services.
