ProLeiT AG:  
Trade Fair & Training Dates 2020

AB Åbro Bryggeri:  
V9 upgrade at renowned Swedish brewery

## Trade fair & Training dates 2020

[www.proleit.com](http://www.proleit.com)

The new training programme dates for 2020 can be found under: [Course overview](#). Check out our website for more details and use our online registration form. Feel free to send us an email if you have any questions: [training@proleit.com](mailto:training@proleit.com). We will once again be represented at numerous trade fairs around the globe in 2020. A list of all the events can be found on our website: [Trade fair overview](#). We look forward to meeting you at the trade fairs. We would like to take this opportunity to wish you a very Merry Christmas and a prosperous 2020!

	Sea Brew	Taipei/Taiwan	29.10.2020	30.10.2020
	Pack Expo	Chicago/USA	08.11.2020	11.11.2020

## AB Åbro Bryggeri: V9 upgrade at renowned Swedish brewery

[www.abro.se](http://www.abro.se)

Åbro, Sweden's oldest family-run brewery based in Vimmerby, has been a ProLeiT customer since 2007. In addition to its award-winning beer, the renowned brewery, founded in 1856, also produces soft drinks. We are delighted that Åbro employs our brewmaxx process control system and in September 2018 we were commissioned to upgrade the plant in Vimmerby from brewmaxx V7.12 to V9.60. This work ranged from the malt intake to the filling line.

It was very important that replacement of the process control system disrupted ongoing operation as little as possible. To ensure this aim was achieved, the ProLeiT team implemented the software update in several steps. Initially, the bright beer cellar, which transports the finished beer to the bottling plant, was upgraded. Due to the freed-up capacities in the bright beer cellar, it was then possible to upgrade the beer filtration system. In a final step, the software update was implemented in the brewhouse. At times, the ProLeiT

team worked three shifts to ensure rapid and seamless implementation.

The software upgrade took place parallel to the replacement of the Simatic CPU hardware. As a result, the brewery now runs on a state-of-the-art operating system and control system platforms. Thanks to the brewmaxx material add-on, Åbro also benefits from a comprehensive materials management system that provides detailed information on historical and current material movements. Employees thus have an optimum overview of stocks and can trace batches.

Åbro has two further production plants, each operated with a ProLeiT control system: a cider plant automated with Plant Liqui iT and Plant Batch iT V9.3 and a smaller brewery, which is automated with brewmaxx express V9.5. The long-term goal is to upgrade these two plants as well.

We would like to take this opportunity to once again express our sincere thanks for the successful and friendly cooperation and we look forward to further automation projects with Åbro.

*Merry Christmas*  
and a Happy New Year
